

- P2
4. A trailer hitch receiver assembly for towing a trailer behind a towing vehicle, comprising:
- a frame member including a hitch receiver box;
  - at least one mounting bracket carried on said frame member for securing said frame member to the vehicle; [and]
  - a trailer light plug; and
  - an AC utility power outlet.

- P3
11. A method of powering an electrical device from a trailer hitch receiver assembly, comprising:
- providing a trailer hitch receiver assembly with a utility power outlet and a trailer light plug; and
  - powering said utility power outlet from said towing vehicle to which the trailer hitch assembly is connected.

Please also add new claim 14.

- P4
14. The trailer hitch receiver assembly of claim 7 further including a trailer light plug.
